FOR IMMEDIATE RELEASE

Altova Launches Version 2021 with a Focus on Customer Requested Features

Beverly, Mass., October 14, 2020 – Altova® (http://www.altova.com) announced the release of Version 2021 of its MissionKit desktop developer tools and server software. This new version includes numerous new features and improvements implemented in response to customer feedback, including a new XBRL Taxonomy Manager that provides easy, centralized taxonomy installation and management across all XBRL-enabled products; data mapping for SWIFT messages; improvements for editing in JSON Grid View; attaching files to PDF during report generation; and much more.

"As the scope of our customers' needs shift and change we are always eager to adapt our offerings to continue to meet their needs and exceed their expectations," said Alexander Falk, President and CEO for Altova. "For example, we've received very positive responses from our customers to the new JSON Grid View features added to XMLSpy and with this release have added even more advanced features. We've also introduced an XBRL Taxonomy Manager across the product line that makes it easier for customers to manage the ever-growing number of XBRL taxonomies and versions available in the industry."

A highlight of some new features requested by customers in this release:

- **XBRL Taxonomy Manager** provides a centralized way to install and manage XBRL taxonomies for use across all Altova XBRL enabled applications. This streamlines a process that can easily get confusing given the number of increasing taxonomies and taxonomy versions that are constantly shifting and changing.
- SWIFT (Society for Worldwide interbank Financial Telecommunications) is a global provider of financial messaging services. Adding to the long list of EDI formats supported, MapForce now also supports mapping **SWIFT messages** to or from any other MapForce supported format, including databases, XML, JSON, other EDI formats and more**.**
- JSON Grid View was introduced in XMLSpy last year, and in this latest release has undergone some significant updates and enhancements. Some of the **improvements for editing in JSON Grid View** in XMLSpy include new entry helpers, additional copy/paste options, mouse-over tool tips, easy options for working with very large files, and more.
- While MapForce has long supported conversion of EDI messages to XML by graphically mapping EDI fields to a target XML Schema, Version 2021 takes this capability further. In response to numerous customer requests, one-click **conversion of EDI to XML** in MapForce without the need for loading a target XSD or mapping fields is now a reality.

- Customers often request the ability to **attach files to a PDF** during report generation in StyleVision. Examples include high-resolution images, source files, other document formats such as .docx, and so on. StyleVision 2021 now makes this possible.
- And many more

These and many additional features are available in Version 2021. To view the new features in each product and access trial downloads please visit: (https://www.altova.com/whatsnew)

About Altova

Altova® is a software company offering specialized tools for both developers and business users. The creator of XMLSpy®, MapForce® and other award-winning products, Altova is a key player in the software tools industry and the leader in XML and JSON solution development tools. The company offers a complete line of desktop developer software for XML, JSON, SQL, and UML; high-performance workflow automation server products; and a cross-platform mobile and enterprise app development platform. In addition, the Altova Cloud offers complete SaaS apps that make working with complex technologies easy for business users. With over 5.4 million users worldwide, including 91% of Fortune 500 organizations, Altova is honored to serve clients from one-person shops to the world's largest organizations. Altova is committed to delivering standards-based, platform-independent solutions that are powerful, affordable and easy-to-use. Founded in 1992, Altova is headquartered in Beverly, Massachusetts and Vienna, Austria.
